

FLY-AWAY CUSTOM HOSE KITS

FLY-AWAY/ CUSTOM HOSE KITS

These Fly-Away kits are small enough and mobile, allowing users to keep at a maintenance station, remote line stations, or can be placed in the aircraft. These kits are used to replace damaged hoses or rigid tubes in the event of unplanned maintenance needs. The hoses cover all pressure requirements and supports hydraulics, fuel, pneumatics, etc.

*Customized kits can be built per your requirements

Our team is happy to assist questions regarding technical assistance, bill of materials or customized kit requests.
