AmSafe Bridport - Centuries of Quality

AmSafe Bridport was formed from a centuries-long tradition in 1979, and today has become recognized as a trusted name in aerospace textiles that provide cargo management, smoke protection, fire protection and thermal management. Proponent is proud to bring our reputation for quality, competitive pricing and product available as AmSafe Bridport's exclusive distributor for many of their platform-specific products, and a distribution partner for their complete line of cargo nets and aircraft accessories.

The below products are safety-critical that should be well-maintained and replaced based on condition or when mandated by the CMM's.

BULK-HOLD BAGGAGE NETS

AmSafe Bridport's bulk-hold baggage nets prevent baggage and other payloads from moving during flight. Specified as original equipment on many commercial and regional aircraft, the nets are easy to remove for loading and unloading cargo and baggage, and manufactured for durability and performance.

SMOKE BARRIER

AmSafe Bridport's fire and smoke barriers prevent smoke and flames from passing from a plane's cargo area into its aircrew compartment. Specified as new in many aircraft, AmSafe Bridport has continually improved on their barriers, as new materials and processes become available. Today's barriers include innovative features like rapid decompression panels, viewing ports and complete smoke and fire penetration protection.

9G BARRIER NETS

AmSafe Bridport's bulk-hold baggage nets prevent baggage and other payloads from moving during flight. Specified as original equipment on many commercial and regional aircraft, the nets are easy to remove for loading and unloading cargo and baggage, and manufactured for durability and performance.
