# PASSENGER LUGGAGE SPACE UPGRADE

## PRODUCT OVERVIEW

- > New retrofit luggage bin doors to upgrade classic cabin interior for A320 family aircraft
- > Increases overhead storage capacity
- > Allows 5 roller bags per 4 frame luggage bin instead of 3
- > Increased bag storage improves speed of boarding process and reduces last minute gate bag check
- > Fast and easy overnight retrofit (7- 9 hours)
- > Modern appearance of main cabin due to new doors and latches
- > Bin décor and color, latch design and color may be customized
- > Light weight composites provide 15-20kg weight savings per shipset
- > EASA STC approved for A320 family
- > New luggage bin doors replace existing doors without the need to remove bins from aircraft.  
**Plug and Play installation allows for overnight installation**
- > Increased overhead luggage storage space speeds up overall boarding process speed.  
**Improve your overall aircraft utilization by reducing turn times**
