The AUTOTRANSFORMER ASSEMBLY is part of the Wing Icing Inspection Lights and Taxi Lights on each side of the forward fuselage section of the aircraft. Its function is to stepdown the input voltage of 115 VAC to an output voltage of 13 VAC to power the incandescent lamps.

The AUTOTRANSFORMER ASSEMBLY is a toroidal core transformer bonded to an aluminum mounting bracket and consists of a core with primary and secondary wire windings. It measures approximately 4 inches in diameter and 0.75 inches high.

Part Name	ATS PMA P/N	OEM P/N	OEM	ELIGIBILITY
Autotransformer Assembly	4254964ATS	4254964	Airbus/Teleflex Syneravia	A300 Series A300-600 Series A310 Series A330-200, -300 Series A340-200 Series

Advantages of Product Improvement:

Improved availability of parts in the market and offers a substantial cost savings over the OEM part without affecting the original form, fit or function.

Hazmat Statement: Parts manufactured by AAXICO Technical Services do not willfully contain hazardous materials and metals derived from minerals defined as “Conflict Minerals”. These include, but are not limited to, tantalum, tin, tungsten and gold. For more information regarding “Conflict Minerals,” please refer to section 1502 of the Dodd-Frank Act.
