

SAVE BIG WITH
 **AstroNova**
AIRBORNE PRINTER PAPER

Proud partner and exclusive distributor for AstroNova

4 REASONS TO SWITCH FROM HONEYWELL TO ASTRONOVA FOR YOUR AIRBORNE PRINTING NEEDS

- 1** *AstroNova's airborne paper produces crisp, high-contrast images that last for five years.*
Extending the life of thermal printheads, AstroNova paper improves reliability, resulting in fewer printer failures.
- 2** *AstroNova's highest quality paper protects your print-heads and your data.*
AstroNova starts with only the highest quality base paper with low friction to minimize print-head wear. Combine this with very low concentrations of corrosive materials and controlled moisture content & thickness, you can trust your data is safe and your print-heads protected.
- 3** *AstroNova paper has a longer shelf life.*
No need to worry about wasted inventory. AstroNova's quality Airborne Printer Paper has a shelf life of three years (before imaging), and will last for seven years after printing!
- 4** *AstroNova paper is 100% BPA-free.*
Did you know that most thermal printer paper contains Bisphenol A (BPA)? Keeping your health in mind, AstroNova has made its entire line of airborne printer paper 100% BPA-free.
