

Your Partner in Aerospace Distribution

When Our Parts Come Together, Big Things Happen

Since joining forces in mid-2016, Kapco Global and Avio-Diepen have worked side by side to form the world's largest independent aircraft parts distribution company.

With 110 years of collective experience supporting the MRO, OEM and airline markets, we have built on the strengths, scale and relationships of both companies to achieve growth and unity. As the aerospace market continues to develop and grow, we felt that it was important that we came together in a more meaningful way, to ensure the quality and consistency of our customers' experience.

Moving forward, we will continue to provide the high quality parts and the unparalleled service you rely on from Kapco Global and Avio-Diepen, under a new name: **Proponent**.

Why Proponent?

proponent |prə'pɒnənt|

noun

an advocate; a champion; a supporter

We wanted a name that reflected our separate histories, our joint future and our combined commitment to remaining the world's leading aerospace distribution company. We settled on a name that says in one word what we represent to our customers in every interaction.

Your Partner in Aerospace Distribution

Proponent isn't just a new name: it's a mission statement.

We know you need more than just parts from your aerospace distributor. You need speed, you need reliability, you need creativity – you need a true partner.

We work hard to understand our customers' needs so we can anticipate and address them in the future.

With a wider product portfolio, a broader global footprint and a larger sales organization than ever before, Proponent provides the scale and agility you need, the innovative solutions you want and the personal touch you deserve.

When you think of Proponent, we don't just want you to think of parts; we want you to think of partnership.
