

SAFRAN CHEMICAL OXYGEN GENERATOR

12' CHEMICAL OXYGEN GENERATOR (PMA certified COG for 737, 757 & 767)

For over 40 years, Safran Chemical Oxygen Generators (COG's) have been recognized for quality and excellence in the aviation industry. Safran COG's were first used on McDonnell Douglas and Lockheed wide bodies and was line-fit on select Boeing, Airbus and Embraer platforms. These quality COG's are currently being utilized on newer platforms such as A220 and SSJ100. Over the years, Safran has produced over 1.3 million COG's.

Safran introduces the PMA COG certified for 737, 757 & 767:

- Cost efficient alternative,
- Longer life span,
- Available now for the market,
- Same high Safran quality.

SAFRAN COG'S ARE A DIRECT REPLACEMENT FOR EXISTING PRODUCTS ON A ONE-ON-ONE BASIS
