We've got you covered.

## NYCOTE® SURFACE TRACE

Surface Trace is a machine-readable protective surface coating made from Nycote's flagship 7-11 & 99 coatings. This high-performing coating creates an optical fingerprint that can be customized to identify specific I.P. and its owner, significantly reducing counterfeit, product tampering, and allows traceability of parts throughout the supply chain.

## NYCOTE® NYFORM

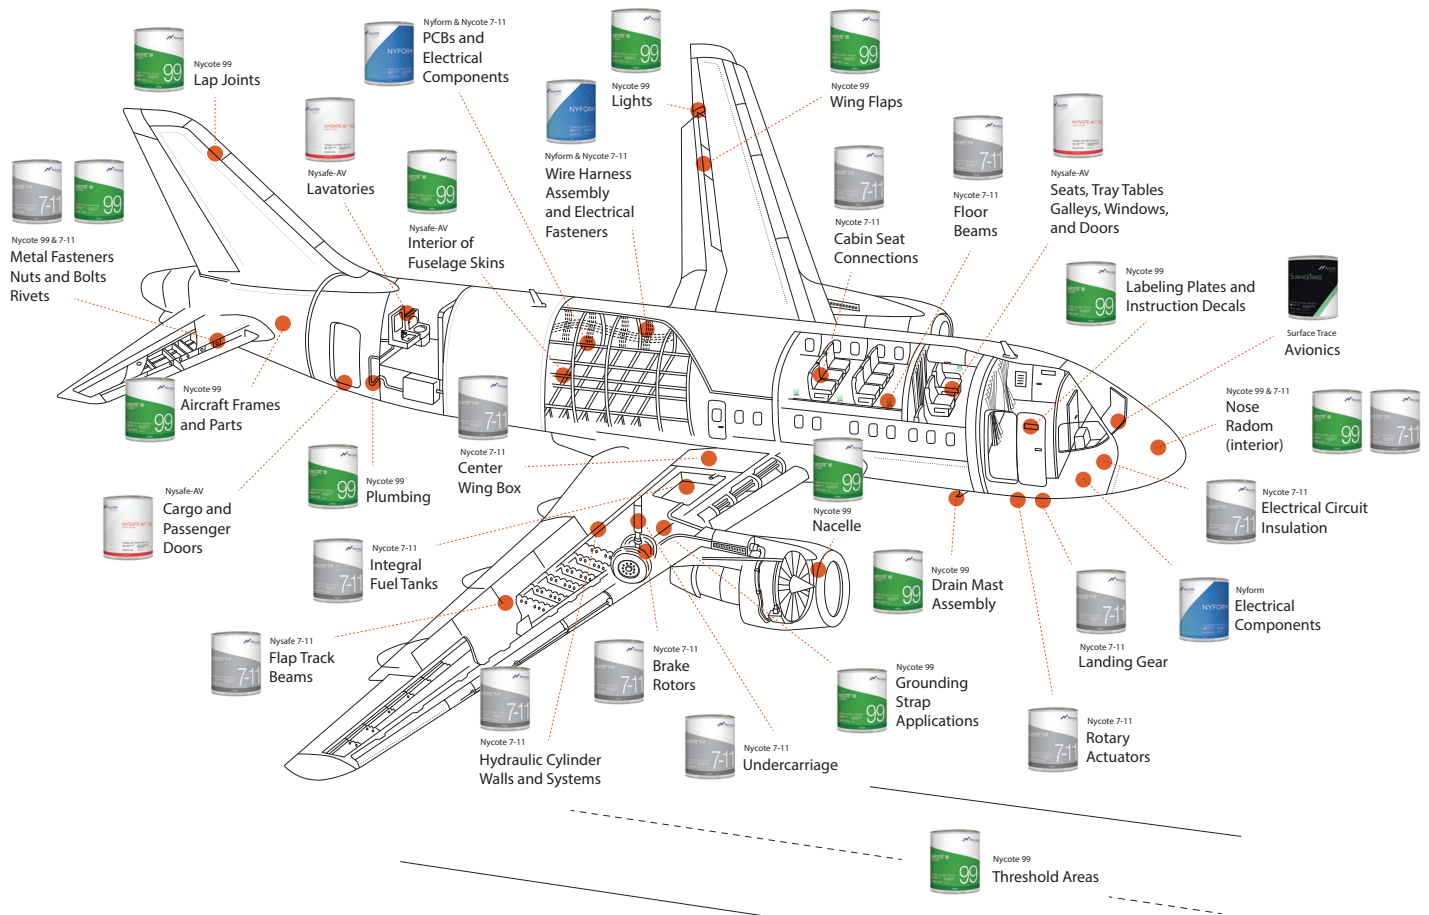

This next-gen protective conformal coating is capable of adhering to multiple substrates, is stronger than acetate conformal coatings, but easier to remove than epoxy products. Nyform meets qualification and performance of electrical insulating compound for printed wiring assemblies.

## NYCOTE® NYSAFE-AV

Nysafe 700-AV & 900-AV is a 2-part, cross-linked nylon polymer. This high performance coating is derived from Nycote 7-11 and 99 with a highly effective, safe, and antiviral formulation tested to protect against SARS-CoV-2, s. Aureus, staphylococcus, fungus and other bacteria and pathogens.

## NYCOTE® 7-11 & 99

Nycote 7-11 and 99 are highly cross-linked multipolymer nylon epoxy coatings. Trusted for over 60 years by all major OEM's to provide an excellent permanent barrier from harsh environments. With a unique ability to cure pinhole-free and self-level and allows for complete encapsulation, Nycote's flagship products will protect your assets for years due to the strength of the epoxy and flexibility of the nylon polymer.
